Capturing the art scene

Lebanese artist and interior designer Imad Bechara has launched 'Bechara Studio' at the tranquil Green Community, following a string of captivating art exhibitions in the region. Following a thriving career as an interior designer, Bechara Studio has created a platform for Bechara to display his own unique style of artwork, developed over the past fifteen years in which he uses acrylics and mixed media to design abstract and figurative pieces for commercial and personal possession. Since launching his career Bechara has built a large following globally. His work is sought after by royal families in the Gulf, and for private collections in Europe, Australia, New Zealand and the Middle East.
