Captivating Art

Bechara Studio opens its doors

Art enthusiasts made their way down to witness the launch of Bechara Studio by Lebanese artist and Interior Designer Imad Bechara. Located at the tranquil Green Community, Imad opened his doors to showcase his unique talent that has spanned over the past decade, only to be finally realized from a hobby to a career with the opening of the studio. The artist's unique work is evident in his use of acrylics and mixed media which he uses to design abstract and figurative

pieces for commercial and personal possession. Those who made it to the event were in awe of the artist's creative touch that captures the very essence of art, and based on his global following of fans that range from Royal Families in the Gulf to personalities who crave his private collections from as far as Australia and New Zealand, as well as various parts of the Middle East, this was certainly an event that etched a place in the minds and hearts of those present.
